

Shade tolerance of the tree of heaven in southern Switzerland

Monte Verità, November 2, 2016

Simon Knüsel, PHD student, simon.knuesel@wsl.ch

Main advisor: Dr. Jan Wunder

Committee: Prof. Dr. Harald Bugmann, Dr. Marco Conedera, Dr. Jan Wunder

Tree of heaven - *Ailanthus altissima*

- Deciduous
- Pinnate leaves
- Up to 30 m high
- Dioecious (male and female plants)
- Vegetative reproduction (stem- and root sprouts)

Regeneration in low light conditions

Knüsel et al. (2016), Biological Invasions

Age and height growth

	Tree of heaven generative	Tree of heaven vegetative	Silver fir
Age (years)	3 (1/7)	3 (1/7)	22 (5/32)
Height growth (cm)	38 (9/109)	53 (20/161)	9 (2/93)

Median values (min/max in brackets)

Height growth: mean growth over the last 3 years

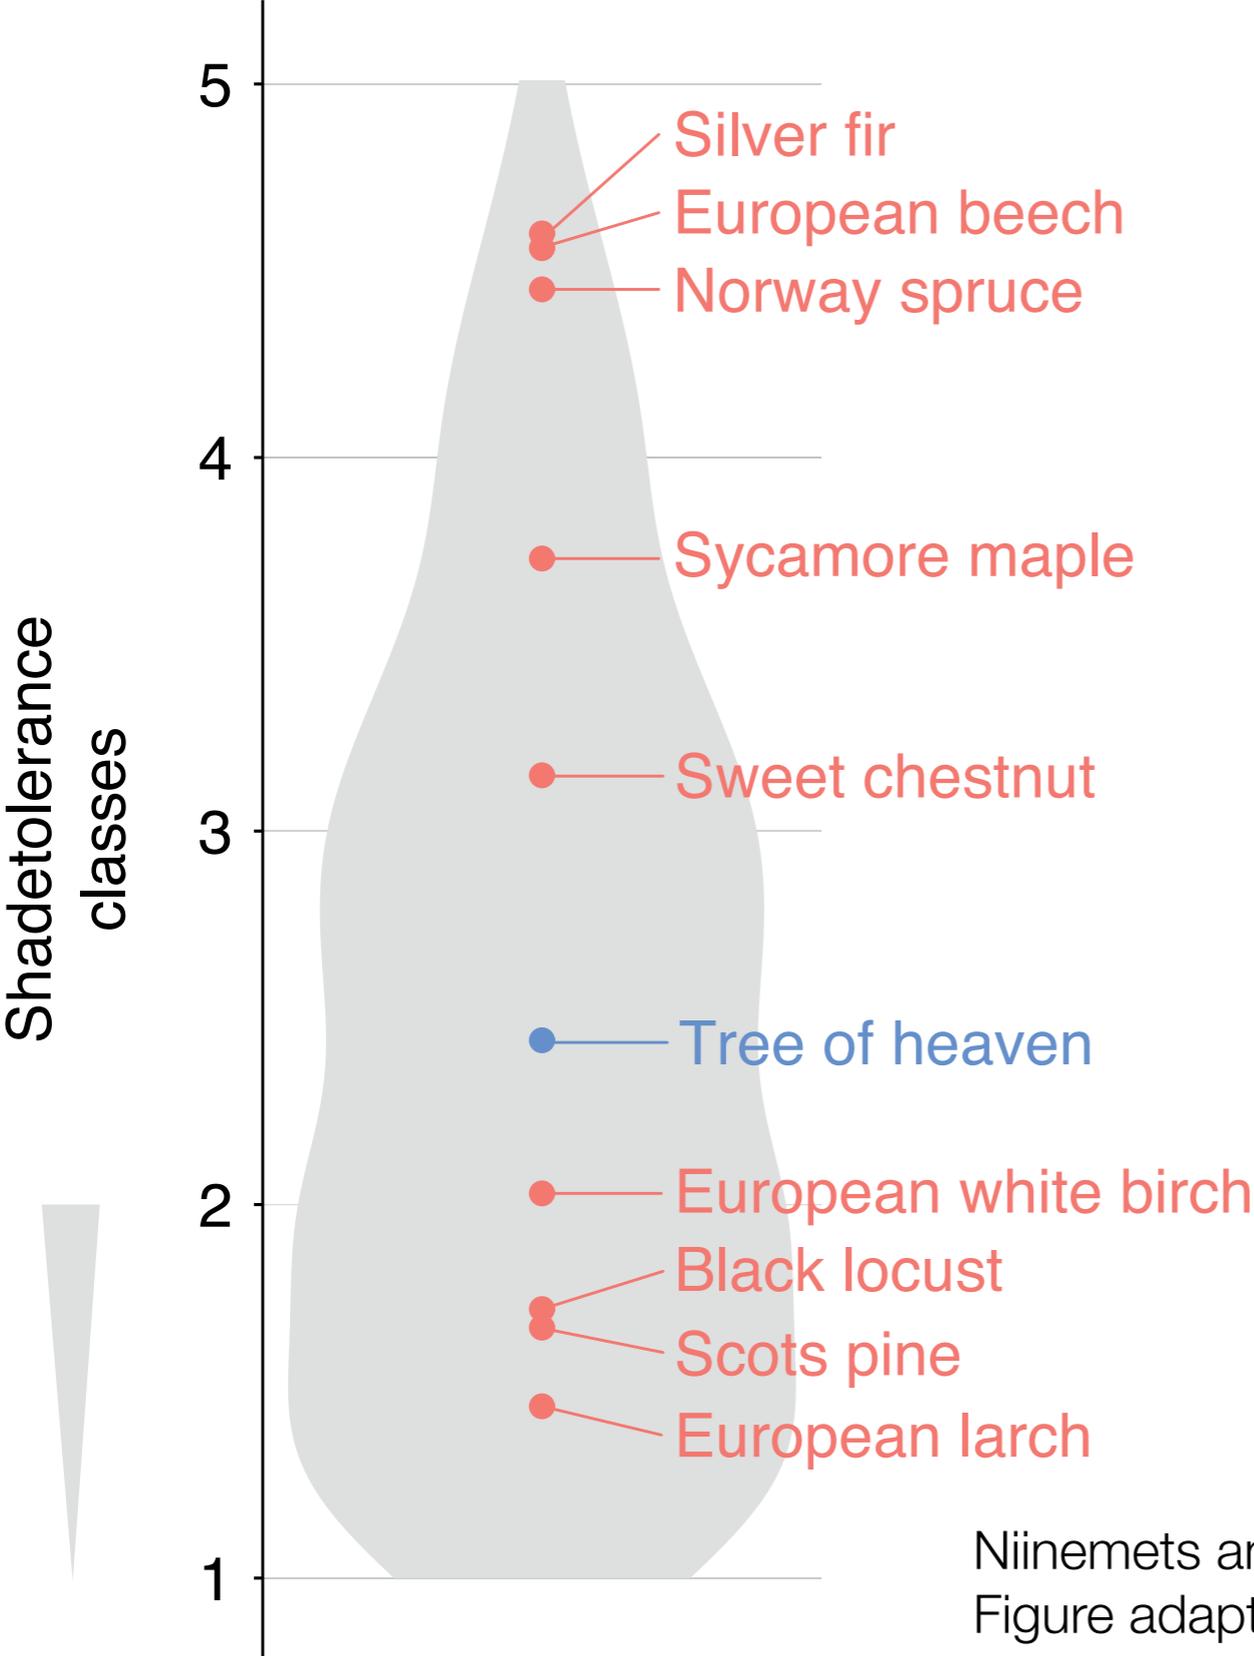

Tree of heaven:
Knüsel et al. (2016), Biological Invasions

Silver fir:
Cadotsch (2011)

How shade tolerant is the tree of heaven?

We view the **tree of heaven** as a tree species with a **low to intermediate shade tolerance**.

How shade tolerant is the tree of heaven?

Niinemetts and Valladares (2006), Ecological Monographs, Figure adapted from Appendix

Management options

- Monitoring of the colonization frontier
- Monitoring should include closed canopy forests
- Especially important in the vicinity of female trees
